### What would you say about your experience with aksh?

first of all i would like to say that the tag line which aksh is carrying "live smart" they really mean it And it have been around 16year we are working with aksh and literally my experience is very very good in terms of professionally as well as personally also.

### What would you like to see changed in product quality?

Yeah, if we go through products although we only buy optical fiber with them quality is very good and also they have maintained that quality throughout the years the only change we want from aksh is that drum printing and outer quality that's it ,rest the cable quality is absolutely perfect and also adapted by our cable industry.

### Which features do you love in our process?

The features we love in the process of aksh is their uniformity of work that means either they are competing with other brands or not they don't compromise with their quality.

### What does our business do better?

From my opinion or as in suggestion aksh have to do more marketing coz in many states people even don't know "who is aksh" that actually aksh don't deserve when there will be more marketing of aksh products then people will come to know that " what the quality is and where aksh stands soo in my terma aksh have to put efforts in their marketing session.
